	Worked on Web technology such as **HTML5, CSS3, Typescript, JQuery, JavaScript and Bootstrap**.

Cognizant Technology Solutions_____   From 21 June 2016 – Till date

Project#1   MFRP- Shopping Website (2 months)

Location	Offshore (Pune)
Technologies	HTML, CSS, jQuery, Bootstrap, Javascript
Tools	Sublime Text, Notepad++
Operating System	Windows 7
Role	Web Developer [Front-End]

Project Description:

There was whole one module in this application which needs to be developed.

Functionalities like search items according to various filters like color, price, brand, size, add items to cart, carousel, basic functionalities like JSON fetching, Ajax call were implemented. The application was made responsive using bootstrap and media queries to enhance user experience.

Project#2   Discover-acquisition(www.discover.com)

Location	Offshore (Pune)
Technologies	HTML, CSS , jQuery, Typescript, Javascript , Bootstrap
Tools	Sublime Text, Notepad++
Operating System	Windows 7
Role	Web Developer [Front-End]

Project Objective:

To develop full Web pages from scratch and to implement the functionality for the same.

These web pages are made responsive according to the requirement and are made accessible to physically challenged people with disabilities by implementing accessibility.

Project Description:

Discover Financial Services, is an American financial services company, which issues the Discover Card and operates the Discover and Pulse networks .Discover Card is the third largest credit card brand in the United States, when measured by cards in force, with nearly 50 million cardholders.
Discover Bank provides personal and commercial banking services. It offers online savings accounts, money market and certificate of deposits accounts.
In addition to its card products, Discover also markets savings products, checking accounts, personal loans, student loans, and home equity loans.
This project consists of various modules for cards, account-center, student-loans, personal-loans.
.

Role and Responsibilities:

- Worked in student-loans module and account-center module and developed various global components required in every module.
- Develop innovative website features for new and existing client websites across a wide range of industries to increase functionality, speed, relevancy, and scalability of the website.
- Build a library of reusable code to expedite routine design functions.
- Collaborate with developers on the back end regarding user input, and make adjustments to the coding to exceed client requirements.
- Lead design projects and clearly communicate with all team members regarding project expectations and progress.
- Understanding the requirement.
- Involved in Developing & testing of task developed in frontend technologies on various devices.
- While doing this have strictly followed w3c standard.
